29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Extremely dry conditions make control difficult, spotting, large area of uncontrolled fire line, Thunderstorm activity with little rain. Firefighter fatigue. Sea breezes pose difficulties in line containment. Reburning due to needle fall in areas that were previously burned.

32: Today's observed fire behavior (leave blank for non-fire events):
Ground fire ehavior, creeping and smoldering with short runs, reburning in pinestraw that fell to the ground, moderate torching in heavy fuels, 3-4 foot flame lengths.

|---|--|---------------------------|---------------------------|

38: Actions planned for next operational period:
Complete and improve line on the eastern flank, scure the racepond community and mopup the Fort Mudge area

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**
2. Difficulty of Terrain - **Medium**

40: Given the current constraints, when will the chosen management strategy succeed?
Without a significant rain event, control is unlikely in the near future.

41: Projected demobilization start date:

42: Remarks:
Acreage increase due to the inclusion of the Sawfly fire.
